It has been informed that initial entry of the agriculture service connection details can be entered in the LT Billing package by using "ae user" and any modifications can be done in the "aao user" alone. After checking the Connected load by using digital clamp meter, the AEs /O&M are requested to furnish the same to AAO concerned for updation then and there in the AAO user vide cited under references(1)&(2).

In this connection it is further informed as follows:

- 1) The connected load in the LT Billing software has been renamed as "actual updated load".
- 2) Hereafter, checking of connected load (actual updated load) in agriculture service connection has to be made by utilizing three phase energy meter and also the following parameters may be taken for further reference.
  - i. Instantaneous Voltage in all the three phases
  - ii. Instantaneous Current in all the three phases
  - iii. Instantaneous Power Factor
  - iv. Instantaneous Maximum Demand
  - v. Instantaneous KW
  - vi. Instantaneous KVAR

3) After verification of **agriculture service connection**, the AE/O&M are instructed to hand over the list of agriculture services to the AAO Revenue unit in the following format:

Category:Normal/SFS

S.No.	Name of the consumer	Existing sanctioned load in HP	Actual updated load in HP (After checking)

4) On receipt of the above data, AAO of revenue unit are instructed to get approval of Executive Engineer/O&M concerned for actual updated load and enter the same in the AAO user of LT Billing software.

5)If the actual updated load is less than the sanctioned load, the existing sanctioned load may be treated as updated load and the same may be entered in actual updated load.

6) Hereafter, the sanctioned load need not be changed. However, in respect of modification have already done in the sanctioned load in LT billing software after testing the actual connected load, the original sanctioned load may be reintroduced and the actual updated load may be modified.
